# A detailed look into the CF Student Learning Journey

## Singapore's Most Comprehensive Physics Specialist Centre

*Our Unique Blended Programme Ensures Students Benefit From Multiple Modes of Learning.*

### Support #1 Strong Team of Tutors

Subject Specialist Guidance

#### No One is Smarter than Everyone.

CF Tutors work as a team. We constantly upgrade our lesson delivery strategies, curriculum plans and learning resources through a structured professional development plan. In this programme, tutors build upon the knowledge of one another. In CF, there are no star tutors. We only have one STAR TEAM.

#### Onsite Lessons

Students travel to the centre to attend lessons. CF follows MOE Safe Management Measures strictly to ensure students learn in the safest possible physical environment.

#### Online Lessons

Students attend lessons online from the comfort and safety of home. CF uses multiple platforms to ensure students are engaged and focused during lessons.

Students can choose one of the following class formats:

Hybrid  
Alternate  
Weekly  
Onsite/Online  
Lessons

OR

Full Online  
Online  
Lessons  
Every Week

### Support #2 Exam Prep Focus Groups

Subject Specialist Guidance

#### Clarity, Confidence and Completion

Examination Prep Lectures will be conducted for targeted focus groups every semester before the major exams. These online lectures will cover exam-smart strategies, common questions and mistakes.

### Support #3 Physics Lab Classes

Subject Specialist Guidance

#### Practical Lab Skills Cannot be Acquired from a Textbook!

CF is the only Physics Specialist Centre with a fully equipped Physics lab to conduct hands-on sessions. This gives CF students the edge on preparing for the practical examination which carries a significant 20% weighting!

### Support #4 Marked Assignments

Subject Specialist Guidance

#### Data-driven Progress Tracking

To ensure students learn, CF students are given assignments which will be marked by our tutors and with constructive feedback given. Progress reports will be sent to students and parents for tracking and updates.

### Support #5 Weekly Online Quiz

Semi-Independent Learning

#### Learning through Fun

CF had developed its very own learning portal where students can have fun doing quizzes. To encourage consistent participation, CF students can collect points to exchange for attractive prizes such as Apple AirPods!

### Support #6 Learning Portal & WA Support

Independent Learning

#### Effective Learning in our Digital Era

CF Students receive exclusive access to our learning portal where they can review attended lessons any time. They can also view our wide range of video productions that are designed to help students learn quickly and easily. When customised attention is required, CF tutors are just a text away in our WA Support Programme.
